

File Organizer v.4.65 Released

Sunday, 27 August 2006

Was released File Organizer v. 4.65

Were released general updates for File Organizer.

In new version:

- Created Image Previewer - a special window, that gives ability to view processed images on the fly. It was created, cause we got variety of requests from out registered users, who liked our Media Previewer and wanted the same functionality for images.
- Was rebuilt component for audio (music) libraries organization, what gived users ability to store their libraries on the remote, network servers.
- Appended possibility for advanced files manipulation. No files also may be copied and cut to clipboard, moved and copied to the specified location, deleted irrecovably or to the recycle bin - and all in one click.

Last product version may be purchased in our online store. All registered File Organizer users can get it for free.
